FOR TECHIES
BY TECHIES!

This will be a hardcore technical event hosted by hardcore techies for hardcore techies. Here you will get the chance to interact with speakers and engineers in the Breakout, Lightning, and Community sessions, as well as at Meet-the-Experts, in smaller group discussions, in the Solution Exchange, and during the overall event.

Let's make it easy for you to join

If you are joining us from outside of Denmark, we wish to make your trip and stay in Copenhagen as smooth as possible. Your local VMUG community can provide you with suggestions for hotels, restaurants, and optimal flights and you will also have the chance to travel as a group.
